### **Sustainable packaging solutions for sealants and adhesives: Poly-clip System at the European Coatings Show 2025**

Hattersheim am Main, February 2025

**The packaging of highly viscous products such as sealants and adhesives presents manufacturers with numerous challenges. Efficient production processes, reduced packaging costs, and sustainability are decisive factors.**

**Poly-clip System will present proven and high-performance solutions at the European Coatings Show 2025 with the clip-pak® and the TSCA 65 D and CBS 15 machines, offering both economic and environmental benefits.**

#### **clip-pak®: Efficiency and sustainability in one**

Traditionally, sealants and adhesives are filled in cartridges, which are associated with high material, transportation, and disposal costs. The clip-pak® system offers a flexible alternative: tubular packaging that is securely closed with clips. This reduces material consumption and provides an optimum barrier against moisture and oxygen, which improves the shelf life of the products. In addition, clip-pak® enables easier and more efficient emptying of the packaging.

#### **TSCA 65 D: Reliable sealing and clipping technology**

The TSCA 65 D is a specially developed sealing and clipping machine designed to meet the requirements of highly viscous products.

#### **The advantages of the TSCA 65 D include**

- High-strength sealing seams for maximum product safety
- Reduced material consumption thanks to flexible packaging
- High output and efficient production processes
- User-friendly handling and easy cleaning

With these features, the TSCA 65 D offers an optimal solution for manufacturers who want to increase their packaging efficiency and reduce costs at the same time.

### **CBS 15: Semi-automatic cap bonding system for clip-tube®**

The CBS 15 semi-automatic cap bonding system plays a key role in the production of clip-tube® packaging, a reliable, cost-effective solution for viscous adhesives and sealants. The clip-tube® is a tubular packaging with two clip closures and a threaded end piece with a ring-pull.

It can be equipped with various extrusion nozzles and closures and thus offers a flexible alternative to the classic tube.

#### **Advantages of the CBS 15:**

- Semi-automatic cap bonding system for efficient processing
- Secure and precise fastening of the threaded end pieces using hot-melt adhesive and pressure
- Three workstations with manually operated turntables for easy handling User-friendly and low-maintenance for smooth production
- Can be combined with various end pieces such as sealing caps or extrusion nozzles
- Air-free packaging for longer shelf life and complete emptying
- High packing density compared to conventional tubes for optimized storage
- Reduced packaging waste and cost-effective alternative to the classic tube

This air-free packaging is ideal for viscous products and offers a high packing density compared to conventional conical tubes. Manufacturers benefit from reduced packaging waste, optimized storage, and a cost-effective alternative to the traditional tube.

#### **Visit Poly-clip System at the European Coatings Show 2025 (Hall 4A, Stand 319)**

With the innovative solutions from Poly-clip System, manufacturers can rely on future-proof packaging technology. Come to the European Coatings Show 2025 to see the benefits for yourself and discover how clip-pak® can make your production more efficient and sustainable.

**Poly-clip System at European Coatings Show from 25. – 27.03.2025 in Nuremberg, Germany  
Hall 4A, Booth 319.**

### **About Poly-clip System**

Poly-clip System is the world's largest provider of sustainable clip closure solutions and is recognized as a global market leader and hidden champion in this segment of the food industry and packaging sector. The company group maintains 29 sales subsidiaries along with distribution partners in nearly every country worldwide. Poly-clip System's clip closure solutions excel not only in the meat processing industry and butcher's trade but also in numerous other sectors, such as the chemical industry. For the latest news about Poly-clip System, please visit the [News & Press](#) section of the company website.
